AI-Driven Content

ABEER NASIR

Generative AI Specialist | AI Agent Developer | Digital Marketing Specialist | Meta Ads
Karachi Division, Sindh, Pakistan

Summary

I started learning Generative AI in 2023 with a simple question: How can AI help businesses work better? I didn't have a traditional background in AI, and I didn't follow a fixed roadmap. I learned by building projects, working with real clients, solving real problems, and staying curious. Every project taught me something new, and that's how I built my skills. Today, I help businesses use AI and digital marketing to improve their workflows, strengthen their online presence, and make better use of technology. I enjoy turning ideas into practical solutions that save time, reduce repetitive work, and support business growth. My experience includes Generative AI, AI Automation, AI Agents, Prompt Engineering, Workflow Automation, Meta Ads, Shopify, Social Media Marketing, AI-powered Content Creation, and Digital Marketing. I've worked with e-commerce and D2C brands, particularly in the perfume and beauty industry, helping them set up and optimize Shopify stores, manage Meta Ads campaigns, create AI-assisted marketing content, and automate everyday business processes using no-code AI tools.

What I do

- Build AI agents and no-code automation workflows
- Create AI-powered systems for marketing and business operations
- Plan, launch, and optimize Meta Ads campaigns
- Set up and optimize Shopify stores
- Develop AI-assisted content for e-commerce and social media
- Design workflows that improve efficiency and reduce manual work

Outside of client work, I enjoy sharing what I learn. I've written free ebooks on Generative AI and Digital Marketing to help beginners, business owners, and marketers understand these topics in a practical way. I'm currently open to freelance projects, remote opportunities, collaborations, and full-time roles in Generative AI, AI Automation, and Digital Marketing.

Experience

Self Employed

3 years 5 months

Generative AI Specialist

March 2024 - Present (2 years 5 months)

Karachi, Pakistan

As a Generative AI Specialist, I develop AI-powered solutions that help businesses improve productivity, automate workflows, and enhance customer experiences. I work with Large Language Models (LLMs), Prompt Engineering, and modern AI tools to create practical applications for real-world business needs.

Key Responsibilities:

Design and implement Generative AI solutions using ChatGPT, Gemini, Claude, and other LLMs.

Create effective prompts to generate accurate, high-quality, and business-focused AI outputs.

Build AI automation workflows to reduce manual tasks and improve operational efficiency.

Develop AI chatbots and virtual assistants for customer support and lead generation.

Create AI-powered content for websites, blogs, social media, email campaigns, and marketing materials.

Research and evaluate emerging AI technologies to improve business processes.

Collaborate with teams to integrate AI solutions into digital products and marketing strategies.

Test, optimize, and maintain AI applications to ensure reliable performance and scalability.

Digital Marketing Specialist

March 2023 - Present (3 years 5 months)

Karachi, Pakistan

As a Digital Marketing Specialist, I help businesses grow through Meta Ads, Shopify, AI, and data-driven marketing strategies. My focus is on creating practical campaigns that generate results while making the best use of available budgets.

I have worked with e-commerce businesses, helping them improve their online presence, launch Meta Ads campaigns, optimize Shopify stores, and create marketing content using AI tools. I enjoy testing, analyzing, and improving campaigns to achieve better performance over time.

Key Responsibilities

Planned, launched, and optimized Meta Ads (Facebook & Instagram) campaigns.

Researched audiences and developed campaign strategies based on business goals.

Managed campaign budgets, creatives, and performance optimization.

Optimized Shopify stores and product pages to improve customer experience.

Created AI-assisted marketing content for social media and advertising.

Monitored campaign performance and made data-driven improvements.

Results

Generated 30 qualified sales for an e-commerce brand with a PKR 1,000 advertising budget through Meta Ads.

Generated 6 qualified leads for a client with a PKR 2,000 advertising budget using Meta Ads.

Improved campaign performance through audience testing, creative optimization, and continuous analysis.

Worked directly with business owners to understand their goals and develop practical digital marketing strategies.
